

CC-1000 Accessibility

CC-1010 ADA POSITION STATEMENT

Share Your Care strives to make our locations and services accessible to people with a wide range of disabilities and recognizes and supports the intent of the Americans with Disabilities Act (ADA). Share Your Care promotes measures to ensure that individuals are not discriminated against on the basis of a disability in employment, services rendered transportation or communication.

Share Your Care will design supports and services that are accessible and will remove any existing architectural, transportation, attitudinal and communication barriers when readily achievable.

Furthermore, Share Your Care will educate employees, individuals who receive Share Your Care services and those who interact with Share Your Care in order to sensitize people about the gifts, talents and needs of persons with disabilities, to understand what constitutes a disability and how people with disabilities prefer to be treated.

Adopted by Share Your Care's Board of Directors
January 22, 1996
